

User Story	Satisfied?	Justification	Rejected By:	Validated By:
As a user, I want to be able to view a home page of the site that includes a navigation bar to the rest of the site and contains the top reviewed and most popular games with hyperlinks to the game pages and reviews.	FALSE	"Most popular games" not implemented	Jacob Thrasher	
As a user, I want the ability to log in or out of the site. It should remember my username, email, password, and profile picture.	FALSE	Site does not allow profile picture functionality. Also does not save "favorite genre" on registration	Jacob Thrasher	
As a user, I want to be able to view a page for each game entry which contains pictures of the game as well as a description of gameplay.	TRUE			Jacob Thrasher
As a user, I want to be able to navigate to a new games page that will list out newly released games and the ability to navigate to the individual game's page	FALSE	Gallery only displays all games stored in database. Does not allow user to view new releases	Jacob Thrasher	
As an administrator, I need the ability to easily interface with the website in order to add game entries	FALSE	There is no administration functionality in the current build	Jacob Thrasher	
As a user, I want each game to have tags associated with it such as the genre and maturity rating in order to help the functionality of the search function to find games.	TRUE			Jacob Thrasher
As a user, I want to be able to make requests for games to be added to the website. After review by the admins of the site, I would expect to see my game entry added.	TRUE			Jacob Thrasher
As a user, I want to be able to view a page which describes the dev team, provides contact information to allow for user feedback, and briefly describes ongoing site efforts.	TRUE			Jacob Thrasher
As a user, I want to be able to view a profile page when logged in that will allow me to view and edit my profile information.	FALSE	Profile information cannot be edited by user	Jacob Thrasher	

As a user, I want to be able to navigate to each game's store page for my desired console. For example, if a game as a Steam release, I would like to be able to click a hyperlinked icon to lead me to its Steam page.	TRUE			Jacob Thrasher
